

Nissan Intelligent Mobility moves you one step ahead. In cars that feel like an extension of you, helping you see more and sense more, reacting with you, and sometimes even for you. Nissan Intelligent Mobility is about a better future – moving us to a world that's safer, more sustainable, and exciting.

THE VIEW SEEN BY THE COMPETITION FOR ALMOST 50 YEARS Ground-breaking performance has been at the heart of all six generations of the GT-R. The signature round rear lights - inspired by jet aircraft afterburners - are a fierce reminder of the serious intent and legendary capability that has been designed into every GT-R since the very beginning.

A LEGEND is not built on a lap time. Or a 0-60 number. It's built on obsessive attention to detail and a radical belief that a true supercar delivers performance in real-world conditions for anyone, anywhere, anytime. Perfectly refined yet brilliantly capable, in the right hands it can turn the automotive world on its head.

The new Nissan GT-R: The **ULTIMATE EVERYDAY SUPERCAR**.

VISION
DEDICATION
PASSION

IN THE OCEAN OF AIR

IT'S A SHARK.

NISSAN

HIGH RESOLUTION 8" TOUCH SCREEN

Completely redesigned for the new GT-R, the new 8" touchscreen puts all the information you need in a single location, including audio, navigation and the driver-configurable Multi-Function Display system.

THREE-MODE SETUP SYSTEM

For road, track and almost anything in between: GT-R's three-mode system features three switches to allow on-the-move adjustment of the transmission, suspension and Vehicle Dynamic Control. Supercar performance with amazing flexibility – at the flick of a switch.

ROTARY CONTROL

The rotary control on the centre console lets you control key functions through the 8" touchscreen. Just rotate the dial or push it to the left or right to scroll through all the menus and easily select the option you require.

ENG OIL PRES

PRESET 1

THE DRIVER ENDS AND THE GT-R BEGINS

Special attention to detail makes the Nissan GT-R feel instantly familiar. The number of switches on the dashboard has been reduced from twenty seven to eleven, simplifying the layout. The controls are easy to access, simple to use and intuitively designed to maximise the pure enjoyment of driving.

THE ART OF THE HAND-BUILT EXHAUST

In an era of mass production, the GT-R demonstrates the value of hand-built expertise. In order to cope with the engine's prodigious power output, enhanced exhaust cooling was needed. The solution was to use titanium – a metal that's notoriously difficult to work with.

As well as improving cooling, the GT-R's new Titanium exhaust provides a richer, more exotic sound. It features a control in the cabin that lets you significantly reduce outside exhaust noise upon start-up – ideal in residential areas – or allows you to turn up the volume of the mighty twin-turbocharged V6 when you want to. A true piece of performance art.

CHANGE GEAR IN JUST 0.15 SECONDS

The longer a gear change takes, the less time power is being put onto the road. So for maximum acceleration, the GT-R's paddle-shift six-speed sequential dual-clutch transmission performs gear changes in just 0.15 seconds when in R-Mode – almost as fast as a blink of an eye.

Power at your fingertips: Re-designed steering wheel mounted paddle shifters help ensure that a rapid-fire gear change is easily within reach, regardless of steering wheel position. Two clutches. No clutch pedal. A lightning-quick shift. Inside Nissan GT-R's six-speed dual-clutch transmission, the clutches work together. When the car is in an odd-numbered gear (1st, 3rd, 5th), the even-numbered gear (2nd, 4th, 6th) is pre-selected and ready to make the shift immediately. The transmission is so smart, it even blips the throttle on downshifts to for smoother gear changes.

O.15 SECONDS

ANYTIME, ANYWHERE

The GT-R combines massive performance with the refinement of a true Grand Touring machine. The suspension filters out bumps and noise while still telling you everything you need to know. Steering effort is reduced at lower speeds for easier in-town manoeuvring, while still delivering the precision you want. It all adds up to giving you the feeling of absolute confidence as you charge out of a corner with 555 PS and supreme control at your fingertips.

The Nissan GT-R's ground-hugging aerodynamics and powerful brakes allow it to carry speed much later into a corner. But the real key to its speed is the all-wheel drive ability to put the power down much sooner in a corner. Many powerful rear-wheel drive cars usually require the driver to wait until they exit the corner before applying the power to avoid upsetting the balance of the car. In contrast, the GT-R can power out of the corner sooner and faster.

NISSAN

DYNAMIC BALANCE

Some consider a static 50/50 weight distribution to be perfect for handling. However, Nissan engineers have discovered that a 54 front/46 rear static ratio is ideal. When under hard acceleration, the weight distribution shifts rearward and becomes an approximate 50/50 balance. This translates into enhanced tyre contact for better acceleration, quicker corner and the sublime handling feel that the GT-R is renowned for.

Customer Promise

1. You can trust we will satisfy you.

We offer a warranty service and spare part guarantee for 1-year or 20,000 kilometers. We will provide a courtesy car or cover the cost of a rental car or taxi during service.

2. You can trust we will wash and vacuum the vehicle before returning it to you.

If this is not done, we will give you a coupon for a free wash and vacuum valid for 90 days.

3. You can trust we will be there with you.
